2. Progress of the Medium-Term Management Plan

Medium-Term Management Plan SCSK Group's Core Strategies

■ Pursue dramatic improvements in "Comprehensive Corporate Value" through:

- Reorganization of business areas and redevelopment of business models to continue providing new value to clients and society
- Maximization of the market value of all employees based on the recognition that the growth of employees drives the growth of SCSK Group

All section's action

1 Decisive Business Shifts —Three Shifts

1 Market

Shift toward high-potential business areas

2 Value

Shift toward high-value-added areas

3 Business model

Shift toward high-productivity business models

Concentrate resources to achieve high growth

2 Development of Market-Leading Businesses in Growth Markets

For 2030 - IT for the next delight -

3 Advancement of Next-Generation Digital Businesses through Co-Creation with Society

Managerial Foundation Reinforcement Measures

Promotion of Technology-Driven Approach

Maximization of Human Resource Value

Value-Driven Management

Progress of Core Strategy II

<Core Strategy II>

Development of Market-Leading Businesses in Growth Markets

1 Modernization services for solving social and customer issues

- Manufacturing field (Digital Supply Chain, atWill)
- Financial field (AML, Wealth Management)
- Mid-sized company data-driven management support (ProActive)
- BPM (Business Process Modernization)

2 Innovation services for new value creation

- Healthcare (Support for digital business reforms for the medical field)
- Mobility (Mobility software leading SDM era)

3 Integration services supporting society's digitalization

- Security
- Data integration
- Cloud integration

Market expansion capturing the trend of digitalization

- Global Business (Digital reforms in emerging markets)

Net Sales

(100 millions of Yen) YoY +18.3%

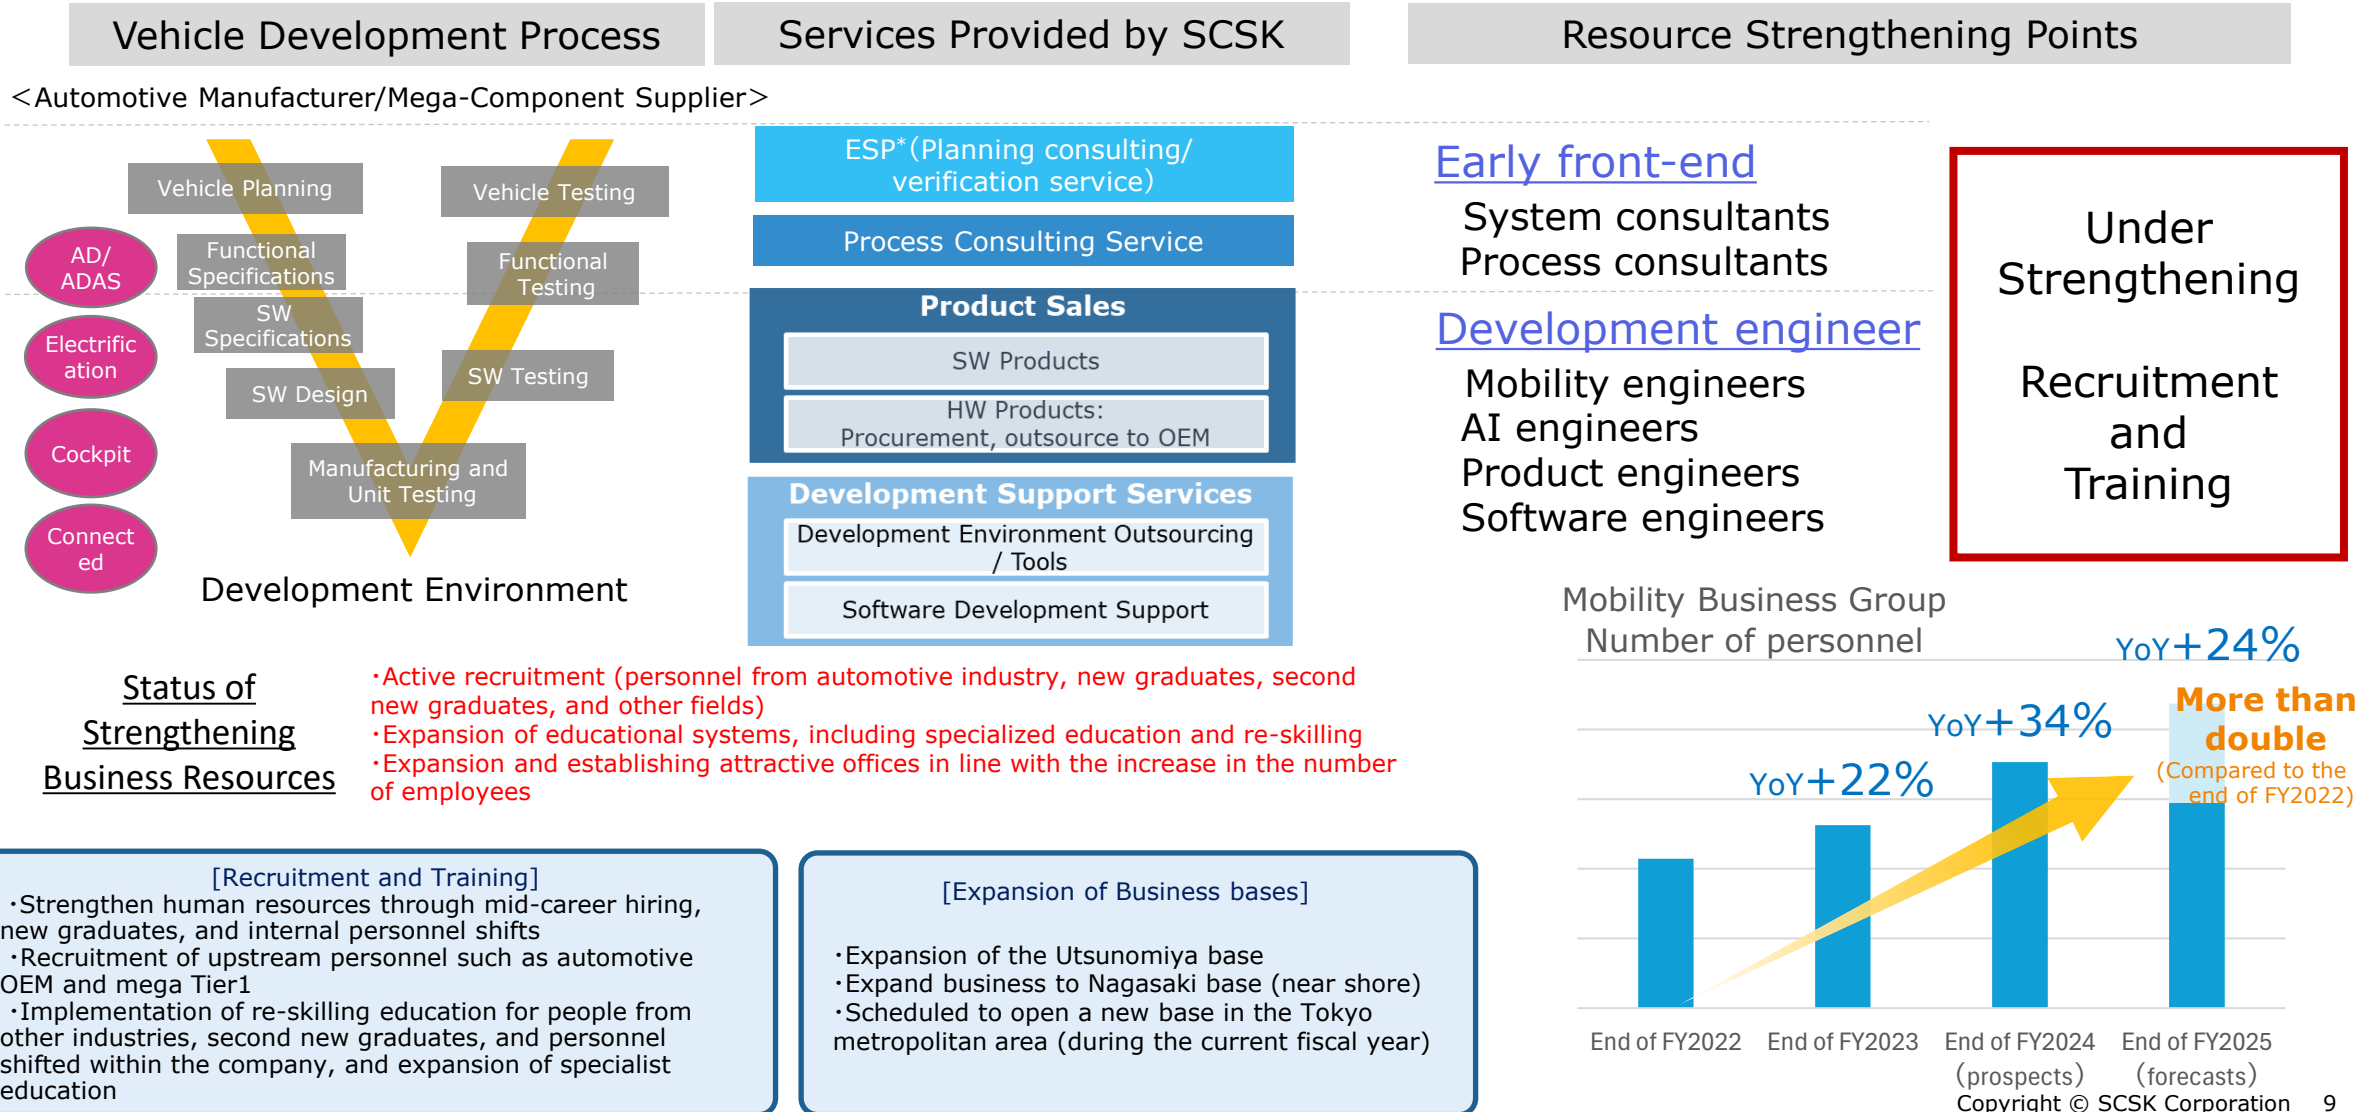

1. Strong performance in the Digital Supply Chain Business for the manufacturing industry, offsetting declines in sales in ProActive and BPM
2. Growth in the Mobility Business by capturing demand for strategic investment in the automotive industry
3. Strong performance in the security business

●Future Initiatives

Core Strategy II Strengthening of Resources for the Mobility Business

Business resource strengthening point

Strengthen the recruitment and training of early front-end and highly specialized engineers

*ESP: Engineering Service Provider

Core Strategy II Current Status of BPO/BPM and Future Initiatives

【Continue business investment for business structure reform】

Sales and profits decreased in the first half of this fiscal year (YoY)

- ✓ Decline in reaction to special demand related to COVID-19 (from FY2023 to 2Q of FY2024)
- ✓ In order to shift from the conventional BPO business, in addition to human resource-related investments (improving IT of platforms, consulting training and recruitment, and re-skilling), we will invest in centers to strengthen group-wide collaboration.

Outlook for the second half and beyond

- ✓ Expecting the effects of structural reforms in the first half, but a full-scale recovery is expected from the next fiscal year onwards
- ✓ Our competitive IT business remains solid.
- ✓ Continue to invest in businesses to transform the business structure from a stock-type in the customer cost field to a recurring-type in the value-added contribution field

【Initiatives for strengthening profitability in the current fiscal year】

Simple BPO to outsource some functions and reduce costs

Transformation of conventional BPO business

- ✓ Reorganization of cost structure
- ✓ Sophistication of IT services (use of business knowledge and automated tools)

Sophisticated BPO to support the transformation of the entire business process and the enterprise

Creation of BPO businesses that lead to BPM

- ✓ Financial services (ex.co-creation services with Internet financial institutions)
- ✓ Industry (ex.support for business transformation utilizing IT from business process analyses)
- ✓ Next-generation services (ex.CX, healthcare)

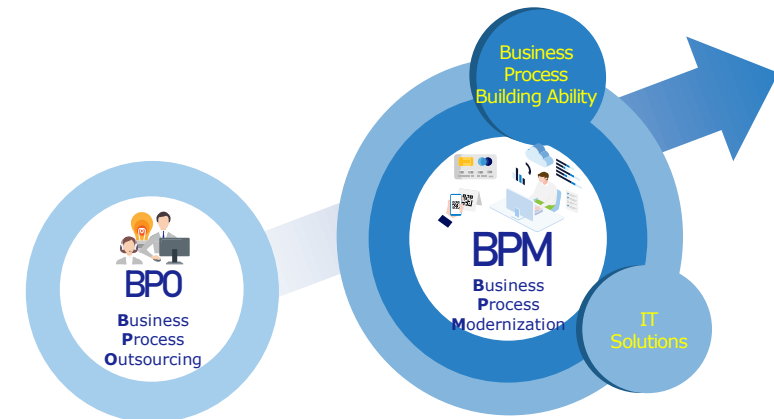

The trend toward polarization of BPO businesses is accelerating

【Financial results of SCSK ServiceWare Corporation】

Major factors behind the change in results in the previous fiscal year

- ✓ Increase in sales due to M&A
- ✓ Reactionary decline in COVID-19-related demand
- ✓ Lower sales in the traditional BtoC Contact Centre business

Core Strategy II ProActive

< Core Strategy II >

Promote market-leading businesses in growth markets

- 1 Modernization services to solve social and customer issues**
 - Manufacturing (digital supply chain, atWill)
 - Financial (AML, wealth management)
 - Data-driven management support for mid-sized companies (ProActive)
 - BPM (Business Process Modernization)

- 2 Innovation Services for New Value Creation**
 - Healthcare (Digital business innovation support for the healthcare sector)
 - Mobility (Mobility software development leading the SDM era)

- 3 Integration Services Supporting the Digitalization of Society**
 - Security
 - Data integration
 - Cloud integration

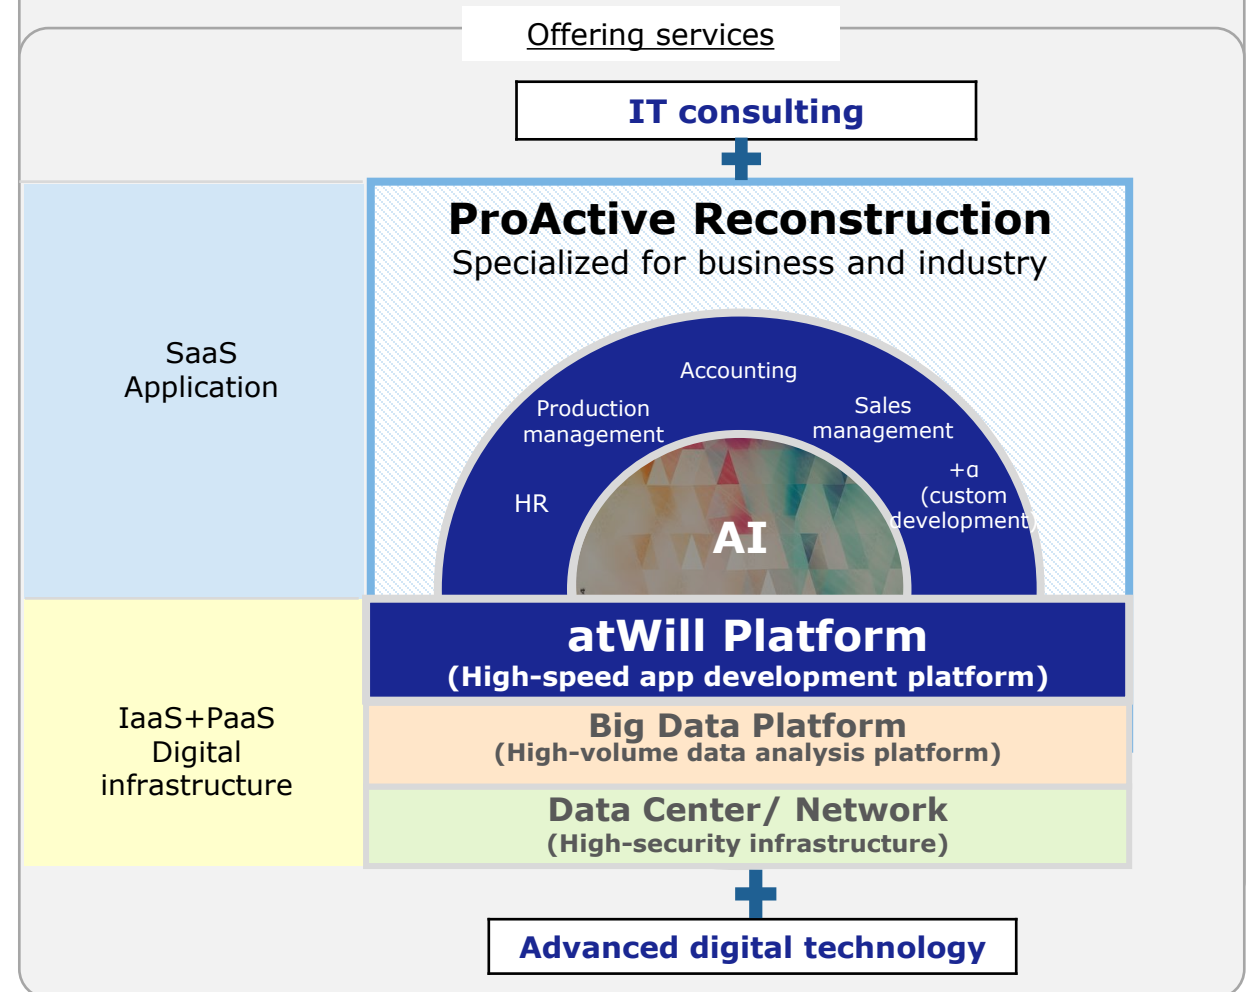

Market Expansion to Capture the Tide of Digitalization

- Global (Digital Reform in Emerging Markets)

For some modernization services such as ProActive and various integration services, we will develop new SaaS/PaaS/IaaS integrated offering services that maximize the use of advanced AI technologies and best practices to solve customers' business and industry issues.

Promoting SCSK's unique offering services

[New ProActive's Aim: To be the core of offering services]

1. Highly AI and data-driven management decisions one step ahead

- Support AI-driven decision making one step ahead
- Enhancing data utilization that seamlessly integrates with external systems

2. Business automation and efficiency through business and industry-specific AI

- Reduce unnecessary work through the use of specialized AI
- Creation of a "comfortable" work environment for employees

3. Unparalleled agility in response to changes in the business environment

- Expand APIs, utilize low-code and no-code tools
- Respond immediately to changing market conditions. Support client businesses in a timely manner.

4. Flexibility to be the core solution for your offerings

- Collaboration with SCSK Intellectual Property
- Improve development productivity and operational efficiency

5. Openness to follow major changes in technology

- Rapid evolution of AI and expansion of the scope of its use
- Ecosystem through collaboration with external solutions

Large modernization of traditional architecture

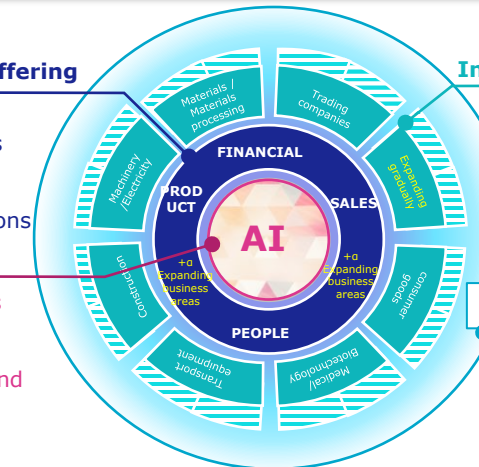

Transform AI functionality into a product that can take advantage of external ecosystems

Business-focused offering

Supporting the provision of solutions for front and back offices and the upgrading of operations

ProActive AI

Through AI functions specializing in operations and industries, identify and automate business issues that exist in each industry

Industry-specific offering

Providing solutions for wholesalers, trading companies, manufacturing, construction, and service industries, and support for upgrading of business processes

atWill Platform

High-speed app development platform
Achieved rapid development with a freely operated no-code development tool, and flexible external collaboration through API

Consolidation of legacy system technical liabilities

- Substitution of old systems with new systems
- Building the foundation for the transition to a new architecture
- Partial disposal of software investment (¥1.1 billion*)

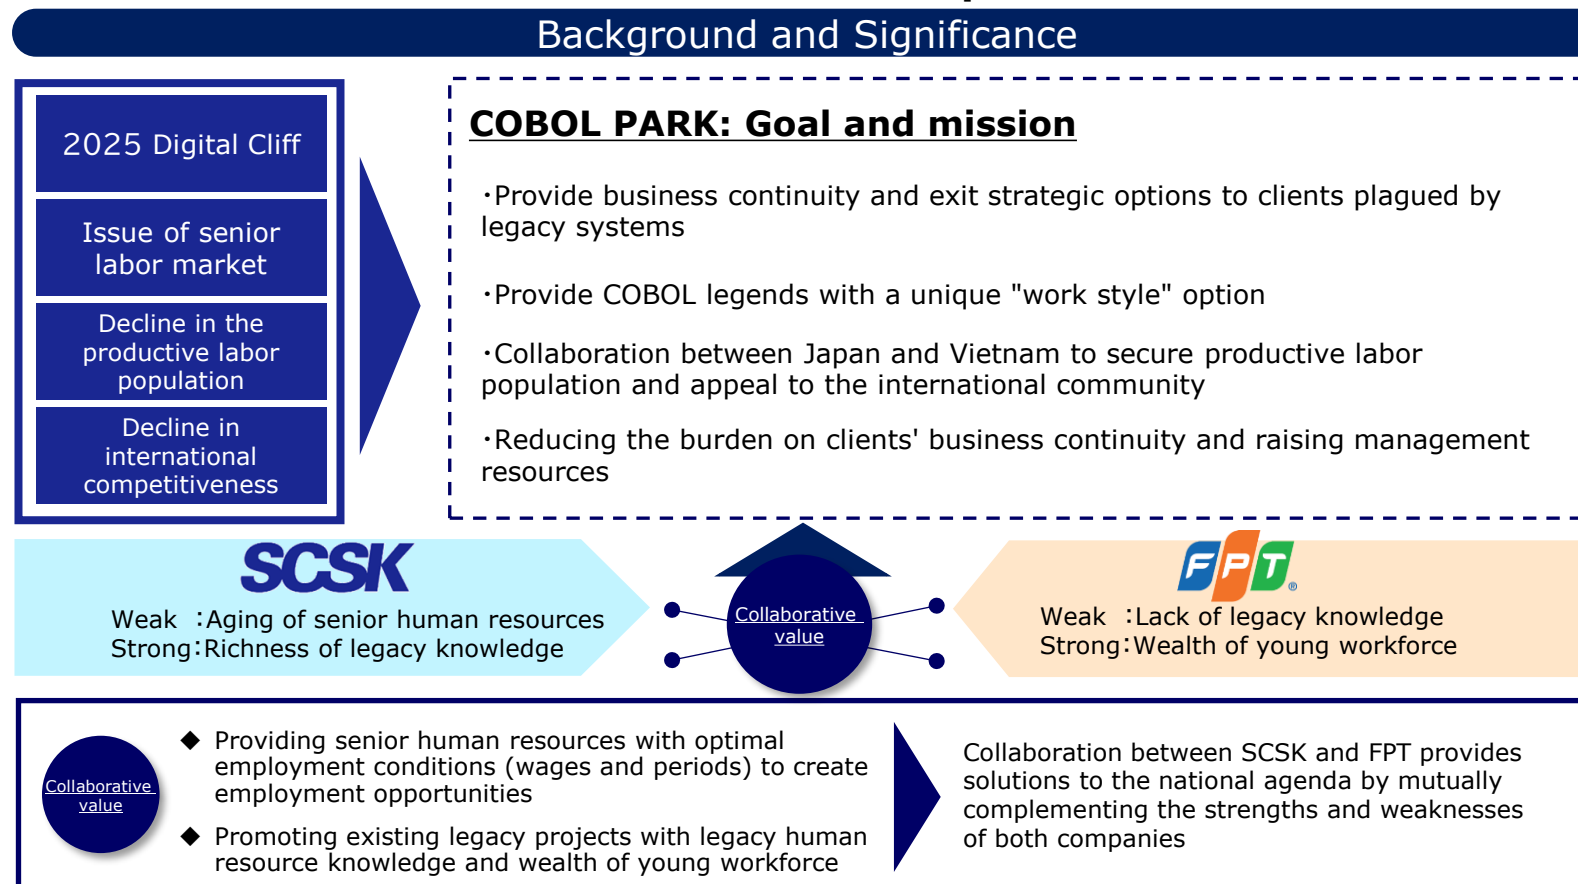

*Recorded in "Other expenses" in the second quarter

2025 Digital Cliff

- Modernization of legacy systems is an urgent issue.
- However, there are many users who will continue to use legacy systems in 2025 or later.
- SCSK will contribute to solving the challenges of modernization while continuing to strategically use legacy systems.

Issues 1. Shortage of human resources ⇒ **COBOL PARK**
2. Aging systems (continued use of system infrastructure and conversion to modernize base) ⇒ MF+*

COBOL PARK (SCSK and FPT Japan collaborate)
