## 1. Qualitative Information Regarding Operating Results for the Nine-month Period Ended December 31, 2025

### (1) Analysis of Operating Results

In the nine-month period ended December 31, 2025, the trade policies of the United States created impacts were felt centered on the automotive industry. Nevertheless, a modest recovery trend continued in the domestic economy as economic activity in Japan picked up.

The Japanese economy is anticipated to see the continuation of this modest recovery trend supported by the benefits of an improved job market, higher wages, and favorable government policies. Nevertheless, there is a risk of downward pressure being placed on the Japanese economy due to the impacts of the trade policies of the United States as well as to the consumer spending trends seen in response to the downturns in consumer confidence accompanying rising commodity prices. Additionally, close attention must be paid to the impact of fluctuations in financial and capital markets.

In this economic environment, the IT services market continues to see an upward trend in corporate IT investment, backed by a strong appetite for spending aimed at strengthening competitiveness and expanding business. Although there is a need for caution with regard to the risk of economic downturns stemming from fluctuations in capital market conditions, consistent IT investment demand is anticipated for applications such as transitioning from existing systems to cloud systems to accommodate the increasingly digital society.

Demand for IT investment continues to increase among customers in the manufacturing industry. Outlets for this investment demand include digitalization efforts such as the redevelopment of core systems and strategic investments. In the communications industry, IT investment demand grew in relation to online and other customer contact points as well as strategic business fields such as generative AI.

In addition, consistent demand is being seen for cloud IT services along with continuous investment demand for redeveloping core systems to address the ends of software service periods amid a robust appetite for improvements in operational efficiency and productivity. Ongoing demand for systems redevelopment and strategic IT investment demand is anticipated against this backdrop.

In the nine-month period ended December 31, 2025, net sales increased 46.3% year on year, to ¥563,092 million, as result of higher sales in all three sales segments—Systems Development, System Maintenance and Operation / Services, and Packaged Software / Hardware Sales—attributable to the benefits of the introduction of Net One Systems Co., Ltd. into the scope of consolidation and the ongoing growth of IT investment demand..

Operating profit increased 46.7% to ¥62,913 million, due to the benefits of higher sales, improved systems development maintenance and operation service profit margins, increased performance in PROACTIVE and business process outsourcing operations, and the introduction of Net One Systems Co., Ltd. into the scope of consolidation. Profit attributable to owners of the parent increased 68.7%, to ¥50,282 million, due to the recording of a gain on sale of investments accounted for using equity method.

In the pursuit of further growth, the SCSK Group will be promoting sustainability management as a growth strategy. Positioning its corporate philosophy and materiality items as the Group's purpose, the SCSK Group will pursue its vision of becoming a Co-Creative IT Company in 2030 with the goal of achieving sustainable development together with society. To this end, we have defined the policies of “Reorganization of business areas and redevelopment of business models to continue providing new value to customers and society” and “Maximization of the market value of all employees based on the recognition that the growth of employees drives the growth of the SCSK Group” in the Medium-Term Management Plan. Dramatic improvements to comprehensive corporate value will be pursued based on these policies.

The Company formulates comprehensive domestic and overseas strategies pertaining to the products and services it offers according to the characteristics of client industries and IT service business areas, and develops businesses in accordance with these strategies.

Based on these business activities, the Company has defined the following six reportable segments: Industrial IT Business, Financial IT Business, IT Business Solutions, IT Platform Solutions, IT Management Service, and Others.

The Company determines its reportable segments by aggregating multiple operating segments into a single operating segment in cases in which the applicable operating segments share similarities with regard to each of the following economic characteristics: (a) the nature of the products and services, (b) the nature of the production processes, (c) the type or class of customer for their products and services, (d) the methods used to distribute their products or provide their services; and if applicable, (e) the nature of the regulatory environment. The business activities of the Company's reportable segments are as follows:

#### **(1) Industrial IT Business**

This segment provides various IT solutions, through systems development and maintenance and operation services for core systems, manufacturing management systems, information management systems, supply chain management (SCM) systems, customer relationship management (CRM) systems and other systems. This segment's services leverage the experience and know-how that we have cultivated over many years. The clients of this segment are primarily companies in the manufacturing, communications, energy, distribution, service, and media industries.

Moreover, this reportable segment supplies the automotive industry with a wide range of solutions for automobile electronic control units on a global basis. These solutions include the development of embedded software through a model-based development approach, proprietary SCSK middleware (QINeS-BSW), software assessments, and process improvement measures.

#### **(2) Financial IT Business**

This segment engages in systems development, maintenance, and operation services for financial institutions. As professionals that understand financial operations and possess a strong track record of creating sophisticated financial systems, members of this segment's staff support secure and efficient management and help clients implement their financial business strategies. The segment provides these services primarily to financial institutions, such as banks and trust banks as well as insurance, securities, shopping credit and leasing companies.

#### **(3) IT Business Solutions**

This segment provides PROACTIVE, an in-house developed ERP (integrated core operations) packaging, as well as production-management systems, and a wide range of IT solutions, including EC service and contact center service. In addition, we provide BPO services that are unique to IT companies, combining manpower support operations with IT.

#### **(4) IT Platform Solutions**

This segment draws on solid technical capabilities and know-how to leverage computer-aided design (CAD), computer aided engineering (CAE), and other advanced technologies in the fields of IT infrastructure and manufacturing. In this way, the IT Platform Solutions provides services and products that accurately address the needs of clients and offers flexible support for a wide range of client businesses.

**(5) IT Management Service**

This segment develops solutions-oriented netXDC data centers, which boast robust facilities and high-level security, to provide clients with proposal-based outsourcing services that address their management issues pertaining to operating cost reductions, infrastructure integration and optimization, governance enhancement, and business risk mitigation. The segment also supplies cloud infrastructure and offers its on-site SE support management services 24 hours a day, 365 days a year.

**(6) Others**

This segment performs remote development (nearshore development) and provides other services out of Group companies that leverage the characteristics of its regional bases and the software development, system operation and management, system equipment sales, and consulting services it provides for a wide range of industries and business models.

The Others businesses did not meet the quantitative thresholds for reportable segments both in the fiscal year ended March 31, 2025 and the fiscal year ending March 31, 2026.

**2. Reorganization of reportable segments, etc.**

From the first quarter of fiscal year ending March 31, 2026, in conjunction with the partial revision of the internal organization, the method for classifying reportable segments has been revised.

Segment information for the nine-month period ended December 31, 2024, has been restated to reflect this change in reportable segments.
