## SCSK Group's Greenhouse Gas Emissions Reduction Targets Acquired the "1.5°C Target" Certification from the SBT Initiative

---

SCSK Corporation (Head Office: Koto-ku, Tokyo; Representative Director, President and Chief Operating Officer: Toru Tanihara; hereinafter SCSK) has been certified by an SBT (Science Based Targets) initiative\*<sup>1</sup> as our group-wide greenhouse gas reduction target is a target based on scientific grounds for achieving the “1.5°C target” set by the Paris Agreement.

### 1. Greenhouse Gas Emissions Reduction Targets

The SCSK Group commits to reduce absolute scope 1 and 2 greenhouse gas emissions 47% by FY2030 and 100% by 2050 from a FY2019 base year. SCSK Corporation also commits to reduce absolute scope 3 greenhouse gas emissions 28% by FY2030/31 from a FY2019 base year. The targets covering greenhouse gas emissions from company operations (scopes 1 and 2) are consistent with reductions required to keep warming to 1.5°C.

### 2. Sustainability Management of SCSK Group

The SCSK Group is promoting sustainability management as a medium- to long-term growth strategy. The SCSK Group considers sustainability management to be of particular importance, and has formulated priority-oriented materiality (material issues) for implementing sustainability management. One of these material issues is “Global Environmental Contributions.”

SCSK Group, centered on its data centers, has been working to reduce electricity consumption with the aim of reducing greenhouse gas emissions. By promoting further power saving and the utilization of renewable energy in the future, we will actively work to reduce greenhouse gas emissions. At the same time, we will contribute to the realization of a carbon-free society and the

development of a sustainable society by implementing environmentally conscious business activities and creating business opportunities that contribute to the environment.

The SCSK Group is committed to achieving sustainable growth by creating new value and helping address social issues together with its stakeholders through the practice of sustainability management that fully capitalizes on its comprehensive capabilities.

\*1 SBT: Initiatives to require companies to set greenhouse gas emissions reduction targets consistent with scientific knowledge to curb increases in global average temperature

\*2 Scope1: Direct emissions of greenhouse gases by the company

Scope2: Indirect emissions associated with the use of electricity, heat, steam, etc. supplied by other companies

\*3 Scope3: Indirect emissions other than Scope1, Scope2 (emissions by other companies related to their own activities)
